

Type 2 Load Center Cabinet

.125-5052 H-32 Aluminum Built Cabinet

Doors are manufactured with a double flange and include 1" x 1/2" Neoprene gasket to ensure a tight fit. 14GA Continuous Stainless Steel hinge with carriage bolts. Door Stop Bracket allows ease of access and secures an open door while working. This Cabinet type comes standard with a 3 Point Latch System with pad lockable handle.

Ventilation-Louvers are located on sides of cabinet and include filters and Top vents for added circulation.

.125 Aluminum Back Panel and mounting hardware is included.

Cabinets are used mostly as Load Centers, but can be used as battery storage enclosures for the solar industry and horizontal shelving can be added.
